

The Research Enabled portal not only connects Researchers to Industry Partners, but provides a platform for effective, efficient collaboration.

Create an IIP

- Choose "Create a new Project" and review your profile information at the top of the form for accuracy.
 - If your information is not accurate, please reach out Research Enabled, and we will work with you to correct the information.
- Complete the mandatory fields with the most detail possible.
 - Tool tips are available to help you.
- Once you submit your final Project, it will be reviewed and approved by your University Administrator, then forwarded to Industry Partners for consideration.
 - Please be aware that we may request you to edit the project in order to meet the policies and requirements of both your university and Research Enabled.

Respond to Challenges

- The majority of challenges require only a short form proposal; however, some Industry Partners request Enhanced Proposals.
 - Enhanced Proposals require a detailed description of the opportunity or need and a value proposition.
- Once you have submitted your final Proposal, it will be reviewed, approved, and forwarded to Industry.
 - We may request that you edit your Proposal in order to meet the policies and requirements of both your university and Research Enabled.

Respond to Requests

- After reviewing the details of a Request, if you chose to respond, all fields of the Request are required to complete your Proposal.
- Once you have submitted your final Proposal, it will be reviewed, approved, and forwarded to Industry for consideration.
 - We may request that you edit your Proposal in order to meet the policies and requirements of both your university and Research Enabled.
